SKILLS

- Javascript
- Typescript
- Node Js
- Express Js
- Nest Js
- REST APIs
- GraphQL APIs
- Mysql
- MongoDB
- Mongoose
- Prisma
- Typeorm
- Sequelize
- Problem Solving
- SOLID principles
- Design patterns

PROJECT EXPERIENCE

SocialMedia platform: Typescript / Node js / Nest js / Prisma / passport / socket.io / multer / nodemailer / react / react-query / apollo-client

- User authentication and authorization using passport
- CRUD operations for (users, chats, messages, notification, posts, likes, comments, ...)
- Realtime notifications using socket.io
- pagination and filtering
- Used dataloaders to solve N + 1 problem
- Used cloudinary for uploading photos
- GraphQL api establish a connection between the frontend and the backend
- Used react for the frontend
- Used Apollo Client for GraphQL data fetching and caching.
- Used React Query for efficient data handling and background updates

Ecommerce: Typescript / Node js / Nest js / typeorm / Ejs / sessions / Stripe

- A website for online shopping
- CRUD operations for Product management
- User authentication and authorization with email verification
- Admin Dashboard

Twitter Clone : Javascript / Node js / Express js / mongoose / pug / jquery / socket.io / multer

- User authentication and authorization with email verification
- CRUD operations for (users, chats, messages, notification, posts, ...)
- Notifications are pushed to the user as soon as they are generated
- Restful API establish a connection between the frontend and the application

Events Shop : javascript / Node js / Express js / Sequelize / Ejs / sessions / Stripe

- A website for Booking events
- CRUD operations for events
- User authentication and authorization with email verification
- pagination and filtering

EDUCATION

- **2021-2025** Faculty of computer and artificial intelligence - **Damietta University**

GPA 3.4
